Washington County Notices

APPLICATIONS FOR NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM (NPDES) PERMITS AND WATER QUALITY MANAGEMENT (WQM) PERMITS UNDER THE CLEAN STREAMS LAW AND FEDERAL CLEAN WATER ACT

- Applicant: **Altian Development LLC**

Applicant Address: P.O. Box 311, Atlasburg, PA 15004

Application Number: **PAD630002**

Application Type: Renewal

Municipality/County: Hanover Township, **Washington County**

Project Site Name: Starpointe Business Park

Total Earth Disturbance Area (acres): 292 acres

Surface Waters Receiving Stormwater Discharges: UNT to Raccoon Creek (WWF)

Proposed Effluent Limitations: The draft permit requires implementation of an Erosion and Sediment Control (E&S) Plan and a Post-Construction Stormwater

Management (PCSM) Plan and compliance with Federal technology-based effluent standards at 40 CFR Part 450.

Rate or Frequency of Discharge: Stormwater discharges during and following earth disturbance activities are precipitation-induced and will vary depending on factors such as the area of impervious surfaces, the size and placement of best management practices (BMPs) and the intensity of precipitation.

Project Description: Renewal of the construction of the Phase 1B portion of the Business Park in Hanover Township, Washington County which is consist of commercial outparcels from the intersection of Waller Way and Starpointe Boulevard east to the intersection of Shovel Road and Stuebenville Pike. The previously approved E&S and PCSM plans for the existing project have not been revised.

Special Conditions: NA

You may review the permit application file by contacting DEP's File Review Coordinator at 412-442-4286.

AIR QUALITY

- **DEM-63-01043A: Range Resources**, 3000 Town Center Blvd, Canonsburg, PA 15317, Jefferson Township, **Washington County**.

On December 13, 2024, Range Resources Corporation (3000 Town Center Boulevard, Canonsburg, PA 15317), submitted a notice of a de minimis increase which would result in an emission increase at its Orenchuk Russell 11890 Well Pad (Jefferson Township, Washington County). This Notice is published per 25 Pa. Code § 127.449(i). The Orenchuk Russell 11890 Well Pad is an unconventional natural gas well pad. This facility is regulated by General Permit GP-5A-Unconventional Natural Gas Well Site Operations and Remote Pigging Stations (2700-PM-BAQ0268), AG5A-63-00026A/GP5A-63-01043A, authorized for use on November 20, 2020. The project is the installation of a 10.1-horsepower, emergency backup generator. The well pad will comply with requirements in DEM-63-01043A. Installation of this emergency backup generator will not change potential air emissions from any other source at the facility.

Per Section A Condition 15 of BAQ-GPA/GP-5A Unconventional Natural Gas Well Site Operations and Remote Pigging Stations which requires compliance with the emission limits in 25 Pa. Code § 127.449(d) among other requirements, the Department has determined this change is exempt from Plan Approval as a de minimis emission increase.

The following list displays the change in potential emissions from the facility during the current permit term:

<i>Action</i>	<i>Date</i>	<i>Source</i>		<i>NO_x</i>	<i>CO</i>	<i>VOC</i>	<i>PM₁₀</i>	<i>PM_{2.5}</i>	<i>SO_x</i>	<i>Combined HAPs</i>	<i>CH₄</i>
			(tpy)								
Potential Facility Emissions Before Change

COAL & NONCOAL MINING ACTIVITY APPLICATIONS

- **Mining Permit No. 30841316. NPDES No. PA0213535. Consol Pennsylvania Coal Company LLC**, 275 Technology Drive, Suite 101, Canonsburg, PA 15317, Richhill, Jackson, and Aleppo Townships, **Greene County**. To revise the permit and related NPDES permit for the installation of an overhead electric line, affecting 52.6 surface acres. Application received: January 13, 2025. Accepted: January 29, 2025.

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

- **EQT Kentor Well Pad, Primary Facility ID # 880177**, 361 Norman Hollow Road, Holbrook, PA 15341, Center Township, **Greene County**. Jona Stoskey, Moody and Associates, Inc., 1720 Washington Road, Suite 100, Washington, PA 15301, on behalf of David Crayne, EQT Corporation, 400 Woodcliff Drive, Canonsburg, PA 15317, submitted a Final Report concerning remediation of soil contaminated with aluminum, barium, boron chloride, iron, lithium, manganese, selenium, strontium, vanadium, zinc. The Final Report demonstrated attainment of the Statewide health standards. Approved: January 28, 2025.

4-West Mine

PUBLIC NOTICE

Notice is hereby given that Dana Mining Company of Pennsylvania, LLC, 966 Crafts Run Road, Maidsville, WV 26541, has requested bond adjustment for the 4-West Mine Permit No. 30031301 pursuant to the Surface Mining Conservation and Reclamation Act.

The 4-West Mine permit was issued on April 25, 2005, and is located in Dunkard Township, Greene County. The permit area is situated north of Dunkard Creek, south of Whiteley Creek, east of Shannon Run and Fox Run and west of Davistown. The mine consists of 16,152.8 acres of underground permitted area and 140.1 acres of permitted surface area. The proposed area can be found on the Garards Fort, PA and Osage PA U.S.G.S., 7 minute series topographic maps.

A bond adjustment of \$1,275,575 is requested for the following: 24.3 acres of surface site located at the former Marshall Portal Site now owned by Garrett Mining Services, LLP.; 23.5 acres of surface site located at the former Main Portal Site now owned by 7 Equities, LLC.; 2.6 acres of surface site located at the former Eisenhower Shaft Site obtained by PA DEP. Also included in the bond adjustment is the sealing of boreholes, shafts, slopes, and the demolition of structures. Total bond held for the 4-West Mine is \$1,570,076.

The requested release adjustment is for the reclamation cost of the sites that are no longer required due to the purchase of two sites, the Department's issued Post Mining Land Use Change from forestland and unmanaged natural habitat to industrial/commercial at the former Marshall Portal and Main Portal, the PA DEP obtaining the Eisenhower site, the demolition of structures and the sealing of boreholes, shafts, and slopes. The bond liability to remain is \$294,501.

Written comments, objections, or a request for public hearing or informal conference may be submitted to the Pennsylvania Department of Environmental Protection, New Stanton District Office, 131 Broadview Rd., New Stanton, PA 15672, within thirty (30) days of the final (4th) publication of this notice. The correspondence must include the person's name, address, telephone number and a brief description as to the nature of the objections.

Cumberland Mine

PUBLIC NOTICE

Pursuant to the Pennsylvania Clean Streams Law, the Pennsylvania Department of Environmental Protection Rules and Regulations, the Surface Mining Conservation and Reclamation Act , and the Bituminous Mine Subsidence and Land Conservation Act as amended, notice is hereby given that Iron Cumberland, LLC, doing business at 200 Evergreene Drive, Waynesburg, Pennsylvania 15370, has made application to the Pennsylvania Department of Environmental Protection to revise Coal Mining Activity Permit No. 30831303 and the related NPDES permit for the Cumberland Mine.

The proposed permit revision is for changing the length of the West Greene District Long Wall Panels LW-76 through LW-79 located within the approved Cumberland Mine underground permit area and underground subsidence control plan area. The proposed revision area is located in Center and Jackson Townships, Greene County, south-southwest of Waynesburg, Pennsylvania and can be found on the Holbrook, Pennsylvania 7.5-minute U.S. Geological Survey topographic map.

The approved West Greene District for long wall mining encompasses approximately 2,855 acres and is rectangular in shape. The northern border begins at a point approximately 1 mile northwest of the intersection of Hoges Run Road and Golden Oaks Road (SR-18). The northern border continues in a southeastern direction for approximately 3.13 miles. The eastern border begins at a point approximately 0.74 mile east of the intersection of Center Highlands Road (T434) and Hargus Creek Road (SR-3011). The border then turns to the southwest and continues for approximately 1.46 miles. The southern border begins at a point approximately 0.66 mile west-northwest of the intersection of Turkey Hollow Road and Iron Rock Road (T457). The southern border then turns to the northwest and continues for approximately 3.13 miles. The western border begins at a point approximately 0.26 mile southwest of the intersection of Macedonia Road and Bristoria Road (SR-3020). The western border continues northeast approximately 1.44 miles back to the place of origin.

Subsidence modeling has been conducted to estimate the location and extent of stream pooling that may be caused due to potential grade changes associated with long wall mining for Garner Run, Hoge Run, House Run, McCourtney Run and Hargus Creek overlying Panels LW-76 through LW-79 of the Cumberland Mine West Greene District. Nine (9) stream segments were identified as potentially exhibiting pooling at or greater than one (1) foot and therefore may require post-mining stream restoration activities. Eight (8) restoration areas have been identified to eliminate the nine (9) proposed pooling areas should they occur at the time of undermining. The location of the proposed stream restoration areas is as follows:

Potential restoration area GAR RA1 is located east of Golden Oaks Road (SR-18), on Garner Run (40643). The proposed restoration area begins approximately 776 feet

south of the intersection of Golden Oaks Road (SR-18) and Bristoria Road (SR-3020) and continues southwest approximately 720 feet along Golden Oaks Road (SR-18). Potential restoration area MCR RA1 is located east of Golden Oaks Road (SR-18), on McCourtney Run (40628). The proposed restoration area begins approximately 1,265 feet north of the intersection of Golden Oaks Road (SR-18) and Bristoria Road (SR-3020) and continues southwest approximately 908 feet along Golden Oaks Road (SR-18).

Potential restoration area MCR RA2 is located south of Golden Oaks Road (SR-18), on McCourtney Run (40628). The proposed restoration area begins approximately 970 feet north of the intersection of Golden Oaks Road (SR-18) and Tower Road (T436) and continues west approximately 2,120 feet along Golden Oaks Road (SR-18).

Potential restoration area MCR RA3 is located south of Golden Oaks Road (SR-18), on McCourtney Run (40628). The proposed restoration area begins adjacently to the intersection of Golden Oaks Road (SR-18) and Norman Hollow Road (T444) and continues southwest approximately 2,750 feet along Golden Oaks Road (SR-18).

Potential restoration area HAR RA1 is located east of Hargus Creek Road (SR-3011), on Hargus Creek (40627). The proposed restoration area begins approximately 0.61 miles north of the intersection of Hargus Creek Road (SR-3011) and Cole Hollow Road (T471) and continues south approximately 880 feet along Hargus Creek Road (SR-3011).

Potential restoration area HAR RA2 is located east of Hargus Creek Road (SR-3011), on Hargus Creek (40627). The proposed restoration area begins approximately 1,089 feet southwest of the intersection of Hargus Creek Road (SR-3011) and Turkey Hollow Road (T454) and continues south approximately 810 feet along Hargus Creek Road (SR-3011).

Potential restoration area HAR RA3 is located east of Hargus Creek Road (SR-3011), on Hargus Creek (40627). The proposed restoration area begins approximately 655 feet south of the intersection of Hargus Creek Road (SR-3011) and Center Highlands Road (T434) and continues south approximately 690 feet along Hargus Creek Road (SR-3011).

Potential restoration area HAR RA4 is located west of Hargus Creek Road (SR-3011), on Hargus Creek (40627). The proposed restoration area begins approximately 0.44 miles south of the intersection of Hargus Creek Road (SR-3011) and Golden Oaks Road (SR-18) and continues south approximately 1,560 feet along Hargus Creek Road (SR-3011).

A copy of the application is available for public inspection, and copying for a fee, by appointment at the Register of Wills and Recorder of Deeds, Greene County Courthouse, 10 East High Street, Waynesburg, PA 15370, 724-852-5284. Written comments, objections, or a request for an informal conference may be submitted to the PADEP (25 Technology Drive,

California Technology Park, Coal Center, PA 15423) no later than thirty (30) days following the final publication date of this notice

Bailey Mine

PUBLIC NOTICE

Pursuant to the Pennsylvania Clean Streams Law, the Pennsylvania Department of Environmental Protection Rules and Regulations, the Surface Mining Conservation and Reclamation Act, and the Bituminous Mine Subsidence and Land Conservation Act as amended, notice is hereby given that Consol Pennsylvania Coal Company LLC, 275 Technology Drive, Canonsburg, PA 15317, has submitted an application to the Pennsylvania Department of Environmental Protection to revise Coal Mining Activity Permit (CMAP) No. 30841316 and related NPDES permit for the Bailey Mine.

The proposed revision adds approximately 52.6 acres of surface permit area for the installation of the 15L Powerline. The project is located in Aleppo, Jackson, and Richhill Townships, Greene County, Pennsylvania and is located on the New Freeport, PA U.S. Geological Survey 7.5-minute topographic map. The proposed permit area begins at the proposed 15L Bleeder Facility, near the intersection of SR 3005 (Long Run Road), Blacks Creek Road, and Stahl Road and continues in a general northeasterly direction for 3.2 miles. It will connect to the powerline at the existing 7L Bleeder shaft facility off of SR 3005. The permit width varies between 100 feet and 600 feet along the powerline. The proposed permit revision includes installation of a 3.2-mile-long overhead powerline and erosion and sedimentation control facilities.

The application includes activities within 100 feet of the right-of-way of the following two roads: Harkins Road (T449) beginning approximately 0.5 miles southeast of its intersection with SR 3005 (Long Run Road) and continuing approximately 110 feet southeast; and SR 3005 (Long Run Road) beginning approximately 0.8 miles south of its intersection with Harkins Road (T-449) and continuing approximately 80 feet south. The road variances are required for installation of the overhead powerline and access of off the roads.

Variances are proposed for the following two streams: two sections of variance for work within 100 feet of UNT 32615 to Long Run the first beginning approximately 3115 feet north and 1700 feet east of the intersection of SR 3005 (Long Run Road) and Blacks Creek Road (T-356) and continuing 115 feet downstream in a northerly direction; and the second

beginning at the culvert under Long Run Road, approximately 4175 feet north and 1260 feet east of its intersection with Blacks Creek Road and continuing upstream 585 feet to the southeast. A 40 foot section of variance for work within 100 feet of UNT 32607-S01 to Long Run is also requested near its headwaters, located approximately 2285 feet north and 2100 feet east of the intersection of Long Run Road and Harkins Road (T-449). The variances are requested for the overhead powerline, tree cutting, temporary access, and erosion and sedimentation controls.

Copies of the application are available for public inspection, and copying for a fee, by appointment at the Pennsylvania Department of Environmental Protection, California District Mining Office, 25 Technology Drive, California Technology Park, Coal Center, PA 15423 (telephone number: 724-769-1100).

Written comments, objections, or a request for an informal conference may be submitted to the Department of Environmental Protection, District Mining Operations, at the above address, no later than thirty (30) days following the final publication date of this notice.

Permit application

PUBLIC NOTICE

Pursuant to the Noncoal Surface Mining Conservation and Reclamation Act and the Clean Streams Law notice is hereby given that Beacon Road Management LLC., 290 Northgate Drive, Warrendale, PA 15086 has made application to the Pennsylvania Department of Environmental Protection (DEP) for a permit to conduct incidental coal extraction. The project is located within Little Chartiers Creek in North Strabane Township, Washington County. This stream is listed as a High Quality Warm-water fishery under the 25 Pa Code Chapter 93 Antidegradation Classification. A request is made for incidental coal extraction on approximately 2 acres within the proposed permit area. The proposed permit area, known as Autumn Ponds SMP# 63240901, is 61.9 acres and is situated north of State Route 519, south of Linden Road, west of Wilson Road, and east North Strabane Township Park. The Washington East, PA, U.S.G.S. 7.5-minute topographic map contains the area described.

A copy of the application is available for public inspection at the New Stanton District Mining Office, 131 Broadview Road, New Stanton, PA 15672. Written comments, objections,

or a request for public hearing or informal conference may be submitted to the Department of Environmental Protection, New Stanton District Office, 131 Broadview Road, New Stanton, PA 15672 by March 25, 2025, and must include the person's name, address, telephone number, and a brief statement as to the nature of the objection(s).

Bailey Mine

PUBLIC NOTICE

Pursuant to the Pennsylvania Clean Streams Law, the Pennsylvania Department of Environmental Protection Rules and Regulations, the Surface Mining Conservation and Reclamation Act, and the Bituminous Mine Subsidence and Land Conservation Act as amended, notice is hereby given that Consol Pennsylvania Coal Company LLC, 275 Technology Drive, Suite 101, Canonsburg, PA 15317, has submitted an application to the Pennsylvania Department of Environmental Protection to revise Coal Mining Activity Permit No. 30841316 for the Bailey Mine.

The proposed revision adds approximately 8.0 acres of surface permit area for the installation of the 13L-3 Degas Borehole. The facility will be located in Aleppo Township, Greene County, Pennsylvania and is located on the New Freeport, PA U.S. Geological Survey 7.5 minute topographic map. The permit area begins near the intersection of Blacks Creek Road (T-356) and Higbee Road (T-447) and follows along the road to the southeast for 280 feet. It extends off the western edge of the road and continues approximately 1070 feet west/southwest, and then 560 feet northwest, varying in width between 175 and 360 feet. The proposed permit revision includes construction of a degas borehole, access road, soil stockpile, and erosion and sedimentation control facilities.

The application includes a request for variance to encroach within 100 feet of the right-of-way of Blacks Creek Road (T-356) near the intersection with Higbee Road (T-447) and continues approximately 225 feet to the south. The road variance is required for site access, including a stream crossing, a contractor laydown area, and erosion and sedimentation controls.

Stream variance requests are proposed for work within 100 feet of three streams: Blacks Creek (32568) beginning near the intersection of Blacks Creek Road (T-356) and Higbee Road (T-447) and continuing downstream approximately 240 feet in a southerly direction;

the headwaters of UNT 32568J to Blacks Creek located 1000 feet west and 120 feet south of the intersection of Blacks Creek Road and Higbee Road and continuing downstream for 105 feet in a northeasterly direction; and the headwaters of UNT 32568J-1 to Blacks Creek located 1050 feet west and 30 feet north of the intersection of Blacks Creek Road and Higbee Road and continuing downstream for 115 feet in a northeasterly direction. The stream variances are required for access to the site including a stream crossing, and installation of erosion and sedimentation control facilities.

Copies of the application are available for public inspection, and copying for a fee, by appointment at the Pennsylvania Department of Environmental Protection, California District Mining Office, 25 Technology Drive, California Technology Park, Coal Center, PA 15423 (telephone number: 724-769-1100).

Written comments, objections, or a request for an informal conference may be submitted to the Department of Environmental Protection, District Mining Operations, at the above address, no later than thirty (30) days following the final publication date of this notice.

Permit revision

PUBLIC NOTICE

Pursuant to the Pennsylvania Clean Streams Law, the Pennsylvania Department of Environmental Protection Rules and Regulations, the Surface Mining Conservation and Reclamation Act, and the Bituminous Mine Subsidence and Land Conservation Act as amended, notice is hereby given that Consol Pennsylvania Coal Company LLC, 275 Technology Drive, Canonsburg, PA 15317, has submitted an application to the Pennsylvania Department of Environmental Protection to revise Coal Mining Activity Permit (CMAP) No. 30841316.

The proposed revision adds approximately 30.0 acres of surface permit area for the installation of the 7 South 1 Powerline. The project is located in Aleppo Township, Greene County, Pennsylvania and is located on the New Freeport, PA U.S. Geological Survey 7.5-minute topographic map. The proposed permit area begins at the proposed 6 South 4 Airshaft Facility, off of Fairview Road (T-445) and continues in a generally northwest direction for 0.4 miles then 1.0 miles northeast. It will connect to the 15I Powerline, slightly west of the intersection of SR 3001 (Aleppo Road) and Riggs Road (T-336). The permit

width varies between 100 feet and 500 feet along the powerline. The proposed permit revision includes installation of a 1.5-mile-long overhead powerline, temporary access, and erosion and sedimentation control facilities.

The application includes activities within 100 feet of the right-of-way of Fairview Road (T-445) beginning approximately 1.1 miles northeast of its intersection with Mudlick Road (T-335) and continuing 110 feet to the northeast. The road variance is required for installation of the overhead powerline, power poles, and temporary access off of the road.

Variances are proposed for the following two streams: A variance is requested for UNT 32567 to South Fork, beginning approximately 820 feet west and 810 feet south of the intersection of SR 3001 (Aleppo Road) and Riggs Road (T-336) and continuing upstream approximately 140 feet in a westerly direction; and a 50 foot section of variance for work within 100 feet of UNT 32536N to South Fork at its headwaters, located approximately 1775 feet west and 410 feet south of the intersection of SR 3001 and SR 3018 (Behm Road). The stream variances are required for installation of the overhead powerline, tree cutting, temporary access for construction, and erosion and sedimentation controls.

Copies of the application are available for public inspection, and copying for a fee, by appointment at the Pennsylvania Department of Environmental Protection, California District Mining Office, 25 Technology Drive, California Technology Park, Coal Center, PA 15423 (telephone number: 724-769-1100).

Written comments, objections, or a request for an informal conference may be submitted to the Department of Environmental Protection, District Mining Operations, at the above address, no later than thirty (30) days following the final publication date of this notice.
