Ginger Hill #1

PUBLIC NOTICE

Pursuant to the Surface Mining Conservation and Reclamation Act, the Pennsylvania Department of Environmental Protection Rules and Regulations and the Clean Streams Law, notice is hereby given that Washington County Land Resources, Inc., 46226 National Road, St. Clairsville, Ohio 43950 has submitted an Completion Report to the Pennsylvania Department of Environmental Protection, California District Mining Office for a Stage II & III bond release of the Ginger Hill #1 Coal Refuse Disposal Permit # 63733706.

The existing coal refuse disposal area, consisting of 208.5 acres, is located on property owned by Washington County Land Resources, Inc. and Mr. Sam Vignoli in Nottingham Township, Washington County. The site is situated approximately 3 miles west of the City of Monongahela, Pennsylvania. The site is located on the Monongahela 7.5-minute USGS Quadrangle Map. The receiving stream of the permit area is a UNT to Dry Run Creek.

The current reclamation bond on account with the PADEP totals $82,000.00. The Stage II & III Completion Report is requesting a release of $82,000.00 for the total 208.5 acres of permitted property.

A copy of the application is available for public review at the California District Mining Office of the PA Department of Environmental Protection. Written comments, objections, or a request for a public hearing or informal conference may be submitted to the PA Department of Environmental Protection, California District Mining Office, 25 Technology Drive, Coal Center, PA 15423 within thirty (30) days of the final (4th) publication of this notice. The correspondence must include the person's name, address, telephone number, and a brief description as to the nature of the objection.

Application

PUBLIC NOTICE

Texas Eastern Transmission, LP (7701 France Avenue South, Edna, MN 55435) intends to submit a National Pollutant Discharge Elimination System (NPDES) Application for an Individual Permit to discharge hydrostatic test water associated with a new pipeline (industrial wastewater) from the Longwall Mining Panel M2 and M3 Project in Greene County, Pennsylvania. Outfalls 001 and 003, located in Center Township, are proposed to discharge to uplands upslope of Jacobs Run. Outfall 004, located in Franklin Township, is proposed to discharge to uplands upslope of a stormwater grate that directs stormwater to Browns Creek. After all testing, the water will be discharged into an appropriately sized dewatering structure for flow management in vegetated uplands. Test water will be reused after each line is tested before a single continuous discharge occurs at each outfall. For questions, please contact Brad Wynnemer with Texas Eastern Transmission, LP at (612) 417-4578 or via email at brad.wynnemer@enbridge.com .

BAILEY MINE

PUBLIC NOTICE

Pursuant to the Pennsylvania Clean Streams Law, the Pennsylvania Department of Environmental Protection Rules and Regulations, the Surface Mining Conservation and Reclamation Act, and the Bituminous Mine Subsidence and Land Conservation Act as amended, notice is hereby given that Consol Pennsylvania Coal Company LLC, 275 Technology Drive, Suite 101, Canonsburg, PA 15317, has submitted an application to the Pennsylvania Department of Environmental Protection to revise Coal Mining Activity Permit No. 30841316 and related NPDES permit for the Bailey Mine.

The proposed revision adds approximately 27.7 acres of surface permit area for the construction of the 7 South 2 Airshaft Facility. The project is located in Aleppo Township, Greene County, Pennsylvania and is located on the New Freeport, PA U.S. Geological Survey 7.5 minute topographic map. The proposed permit area begins off of Strope Road (T-333) approximately 500 feet southwest of its intersection with SR 3003 (Riggle Road). It continues along the road approximately 1255 feet to the southwest. It extends approximately 3500 feet northwest up to the existing Richter Pad entrance off of Miller Road (T-326), varying in width between 25 feet and 705 feet. The proposed permit revision includes construction of the airshaft and boreholes. The proposed permit revision also includes an access road of off Strope Road (T-333), an access road off of Miller Road (T-326), pad areas, stockpiles, a cuttings pile, sediment pond, and other erosion and sedimentation control facilities.

The application includes a request for variance to encroach within 100 feet of the right-of-way of Strope Road (T333) beginning approximately 0.1 miles southwest of its intersection with SR 3003 (Riggle Road) and continuing approximately 1250 feet to the southwest and Miller Road (T-326), beginning 0.2 miles southeast of its intersection with SR 3012 (Greene Valley Road) and continuing 115 feet to the southeast. The road variances are required for access road construction, pad construction, and erosion and sedimentation control facilities including a sediment trap, sediment pond and associated outlets.

A stream variance request is proposed for work within 100 feet of the following four streams: UNT 32577 to South Fork Dunkard Fork beginning approximately 500 feet southwest of the intersection of Riggle Road and Strope Road and continuing 1625 feet upstream in a southwesterly direction; a 48 foot section of UNT 32577R to South Fork, located at its confluence with UNT 32577 approximately 1780 feet southwest of the intersection of Riggle Road and Strope Road; UNT 32583 to South Fork, beginning at its culvert under Strope Road located approximately 1080 feet southwest of its intersection with Riggle Road and continuing on and off upstream 2255 feet in a northwesterly

direction; and UNT 32583B to South Fork at its headwaters, located at a point 1975 feet west and 1105 feet north of the intersection and continuing downstream 140 feet in a southwesterly direction.. The variances are required for access to the site, construction of the sediment pond, a sediment trap, ditches, stockpiles, and pad areas, and installation of additional erosion and sedimentation controls.

The proposed permit revision includes a new NPDES discharge point, located at the sediment pond principal spillway outlet into UNT 32577 to South Fork Dunkard Fork located at 39 degree 4838.3, 80 degree 2804.2. Treated surface water runoff will be discharged at the new NPDES point.

Blasting may be conducted during site activities. Blasting will not occur until a plan has been approved by the PADEP. When a blasting schedule is finalized, residents, owners of dwellings or other structures, local governments and public utilities located within 1/2 mile of the area where blasting will occur will be notified. All residents, owners of dwellings or other structures located within 1/2 mile of the area where blasting will occur will be informed of their right to a pre-blast survey and how they may request such a survey.

Copies of the application are available for public inspection, and copying for a fee, by appointment at the Pennsylvania Department of Environmental Protection, California District Mining Office, 25 Technology Drive, California Technology Park, Coal Center, PA 15423 (telephone number: 724-769-1100).

Written comments, objections, or a request for an informal conference may be submitted to the Department of Environmental Protection, District Mining Operations, at the above address, no later than thirty (30) days following the final publication date of this notice.
